It's all good, no problem, but I would like MapleStory to be 100% compatible with XOS like some big games, as LeagueOfLegend for example.. If you are an Android user, you can pre-register yourself right away using this l ink and receive lots of goodies.. Complete daily dungeons and Elite dungeons (with varying levels inside) to get your rewards (mesos, Auto-Battle cards, jewels etc)! You can also fight solo if you're tired of partying all the time! Test your skill level in the Mu Lung Dojo, Elite/Daily Dungeons, or simply do your Quests!Auto-Quest, Auto-BattlesYou can literally do a hands-off this "mobile game" when you switch on your auto-quest and auto-battle modes! Though you still got to click through the stories and Complete or Accept quests, the larger part of the game can still be auto-ed.. Nexon's MapleStory is the mobile remake of the renowned PC MMORPG With over three million users within the first week of its launch, MapleStory M has definitely left a searing mark on the gaming world! MapleStory M was first released in 2016 but after two years got launched globally across 140 countries, lucky us! The highly-anticipated global launch saw millions of people (both young and younger) around the world counting down to its release date.. Undeniably huge MapleStory M sticker advertisements were placed everywhere in prime bus and train stations – there's no getting away from its impending, glorious reckoning.
